

Battens

Battens offer a stylish, cost effective alternative to traditional screening ideas and can be made in our factory to suit your requirements. Whether building a new home or renovating, battens will modernise the look of your home. Shutterflex can package up doors, gates and fences to match batten screens so the exterior of your home is as stylish as the inside.

Battens

Free, no obligation quotes are available in your home, on site or by sending your plans through by email/fax. Our team are happy to discuss your project requirements at the design stage and advise of products that suit the needs and budget of the project.

Shutterflex is a proud, family run Australian company; we use aluminium and manufacture all our products in our Brisbane factory location. Our battens have been installed throughout Australia in high quality homes and resorts, enhancing architectural and landscape designs.

Shutterflex battens can be used as window sunscreens, awnings over windows, fences, gates, pool enclosures, gable features and privacy screens. Battens can be positioned horizontally or vertically. There is a choice of two standard screens: 65mm x 16mm battens or 50mm x 25mm battens.

With our own manufacturing plant we can make the battens to your specifications. Some of the options available include:

- varying the pitch between the battens
- varying the separation distance between the battens with a minimum set at 10mm
- with a frame or frameless.

Powder coated aluminium requires little maintenance and with the new wood grain finish you can get the look of wood without cutting down any trees. If you want to create an impact with your batten screens, there are over eighty colours to choose from. Powder coating colours are available for all the colourbond colour range so your battens can compliment existing external features on your home. Shutterflex can provide you with a quality installation by qualified and experienced installers. The maximum span between supports without a support bar is two metres.
