

Federation Shutters

Shutterflex Federation Shutters are high quality and are a superior design suitable for residential and commercial buildings. When closed they allow you to enjoy your outdoor living spaces. Being fully adjustable, our shutters give you privacy and security, while allowing you to control the amount of sunlight you let in, without blocking your views.

Our precision-engineered shutters have hollow blades, giving the shutters added rigidity, allowing them to withstand the harshest Australian climates. There are a range of Federation shutters and colours to choose from to suit your home or building.

Not Just a Design Solution, But a Home Improvement

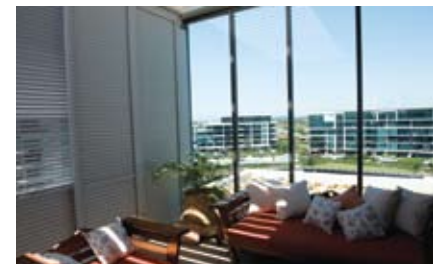

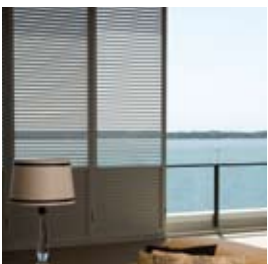

Whether you need to protect your windows from the harsh sun or your balcony from strong winds, Shutterflex has a shutter that will protect your home and look great for years to come.

We offer the widest range of colours and styles and will customise to suit your needs and personal taste. Whether you live in a modern or traditional home, enjoy a coastal or inner city lifestyle, we can design shutters to maximise your use of your living spaces and enhance the look of your home.

Our shutters are highly water resistant, offering you an outdoor living space that can be enjoyed in all weather conditions. Whether you want panels that are fixed, sliding, bifolding or stacking, on a straight or curved balcony, we can do it for you.

Wind Load Testing

Structure Testing of Shutterflex shutters by engineers at The University of Queensland confirms that our shutters are structurally adequate to sustain the wind load required by AS 110.2-1989. The shutters are designed to withstand cyclonic conditions and have been installed in Port Douglas, Cairns, Darwin and Magnetic Island because of their strength.

There are various track mounting options, including:

- channel and track
- mounted on top of tiles, hobs and walls
- recessed into tiles, hobs and walls
- mounted on brackets on front of hob

Screens can be installed using a range of mounting methods with fixings custom designed to suit the application and approved by engineers. Our team are happy to discuss your project requirements at the design stage and advise of products that suit the needs and budget of the project.

Shutterflex balcony shutters with adjustable blades offer apartment owners many advantages:

- use of outdoor balcony spaces in a range of weather conditions
- protection from high winds and inclement weather
- reduces the risk of outdoor furniture flying off
- protection from heavy rain while still allowing air flow and cool breezes on hot steamy days
- privacy screening from other balconies
- safety for young children playing unsupervised on the balcony
- all the above features while still enjoying the magnificent views.

Federation Shutters

Shutterflex can provide you with a quality installation by qualified and experienced installation teams. Free, no obligation quotes are available on site or by sending your plans by email/fax. With many years of experience in commercial projects, Shutterflex knows the importance of meeting deadlines on project schedules.

The Federation Shutters suit a variety of locations including, windows, balconies, decks and outdoor entertainment areas. They are available in a range of blade shapes/sizes and configurations. Whatever the situation, we can install your shutters in a number of configurations to suit:

- fixed panels – ideal for privacy screens
- hinged panels – great for window coverage
- sliding panels – ideally suited to balconies and decks
- bifolding panels – stylish solution for balconies and outdoor areas
- stacking panels – the perfect solution to hide away shutters when not in use
- casement suited to older style homes
- fixed or adjustable blades.

Shutterflex, a Name You Can Trust

Shutterflex has a 20 year long history in supplying shutters to the domestic and commercial market.

Our shutters have been engineered to be strong and durable, to withstand cyclonic winds and stand the test of time in our harsh Australian climates.

Privacy with Style

Shutterflex shutters and louvres can give you privacy from neighbours on small allotments, unit balconies and decks. We design privacy screens that offer a permanent solution or that stack or slide away.

The Green Solution

Shutters and louvres are a great solution to reducing electricity bills to cool the home. By shading the glass on windows and doors the shutters prevent the heating up of the home and allow the house to be cooled in a more environmentally friendly way.

Finishes and Colour Choice

Shutterflex offers a choice of finishes on your shutters, including: over 80 Dulux powder coating colours, anodised finishes or wood grain effects.

Made to Measure

We can design and manufacture unusual panel shapes and sizes to suit your requirements, including gables, curved balconies and archways.

Our Guarantee

Shutterflex provides a guarantee of:

- 15 years on faulty workmanship with regard to mechanism and operation
- 7 years on the standard Durraloy powder coating or equivalent and 1 year warranty on installation and components.
- Shutterflex aims to deliver to you a product and service of the highest quality.
