

Louvreguard

Louvreguard is ideal for horizontal and vertical sun shades outside windows, awnings over windows, air conditioning screens, gable infill, gates and privacy screens. It has been installed on commercial and residential housing for its elegant look, light weight and durability. The fixed frame and fixed angle blades of the sun screen provide cost-effective security and privacy.

Louvreguard panels can be configured as fixed panels or in a number of other ways, including: hinged, sliding, stacking, bifolding and push out. It can be made as a framed or frameless style to suit the design of the building.

Louvreguard is manufactured in Australia using Shutterflex extruded aluminium blades.

Louvreguard

Shutterflex can provide you with a quality installation by qualified and experienced installation teams. Free, no obligation quotes are available on site or by sending your plans through by email/fax. With many years of experience in commercial projects, Shutterflex knows the importance of meeting deadlines on project schedules.

Design Enviro Pty Ltd t/a Shutterflex reserves the right to change specification without prior notice. Images for illustration purposes only.

The spacing or pitch between the blades can be adjusted to suit your individual needs. There are two 45mm blade profiles to choose from:

- a single skin blade with built-in stiffening webs to minimise deflection and noise
- an elliptical blade that is strong because of its elliptical shape
- also available is the 85mm elliptical blade profile.

The Louvreguard comes in a standard blade pitch that give zero overlap between the blades but other blade pitches are available on request.

There are various track mounting options, including:

- channel and track
- mounted on top of tiles, hobs and walls
- recessed into tiles, hobs and walls
- mounted on brackets on front of hob.

Screens can be installed using a range of mounting methods with fixings custom designed to suit the application and approved by engineers. Our team are happy to discuss your project requirements at the design stage and advise of products that suit the needs and budget of the project.
